

Gain Control of GLP-1 Costs and Improve Employee Health and Productivity

The rising prevalence of overweight and obesity coupled with the escalating expense of GLP-1 medications is placing a growing burden on employers of all sizes.

7 of 10

adults are overweight or obese¹ costing employers up to \$3,097 per person in added medical costs each year²

9%

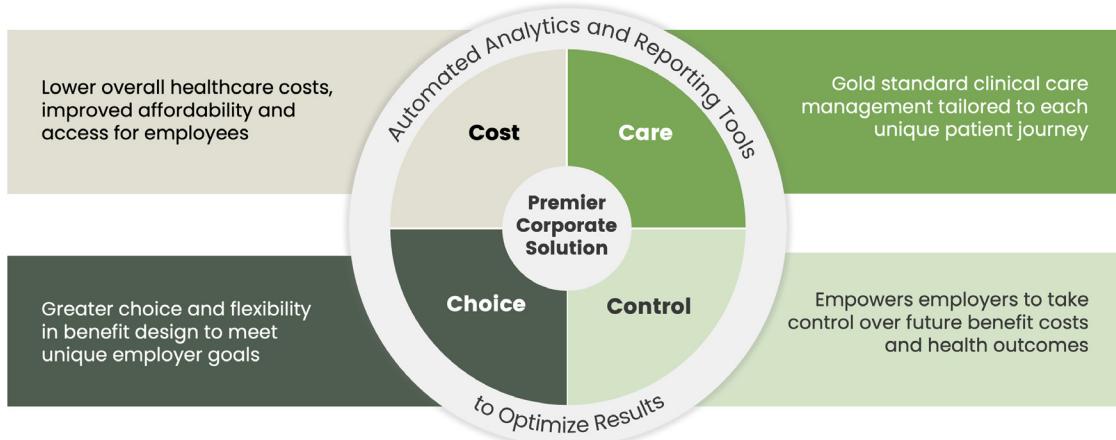

of U.S. population projected to use GLP-1s at a cost of \$100B by 2030³

You can help your company tackle skyrocketing GLP-1 expenses and the growing challenges of obesity with a first-of-its-kind corporate medical weight loss program.

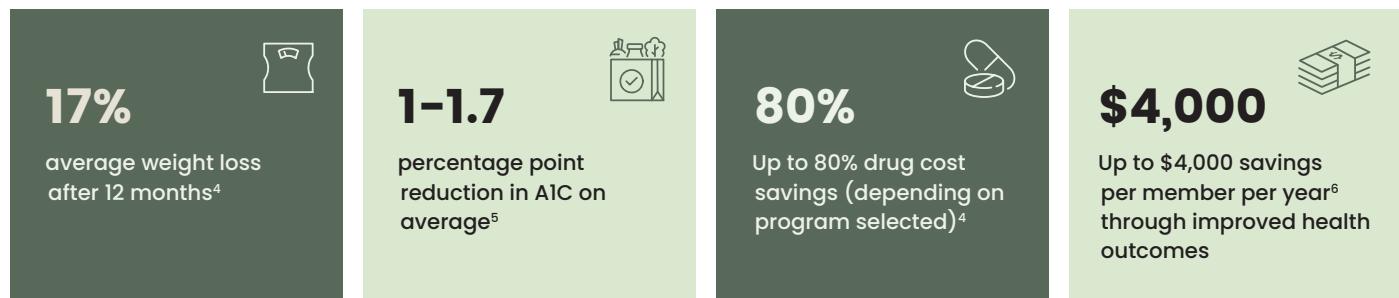

Introducing Ivím at Work

Ivím Health, an industry-leading GLP-1 solution provider, and Xevant, the leading provider of data analytics and healthcare solutions, are partnering to offer Ivím at Work – a robust medical weight loss program at a sustainable cost.

The Building Blocks of a Sustainable Weight Management Benefit

Benefits to You

- Healthier employees and lower overall healthcare costs
- Reduced sick time and medical leave due to metabolic comorbidities
- A more competitive benefit offering to attract and retain top talent
- Happier, more productive employees
- Access to advanced analytics and real-time insights through your benefits partner to optimize program results

Cost-Effective, Sustainable Medical Weight Loss is Possible

A healthy workforce is the backbone of a successful business. Elevate your corporate health strategy with easier access to GLP-1 therapies paired with unmatched clinical care and oversight at lower costs for everyone.
